

STMC COIN is an Amazing Crypto ICO Trading Platform

Suitable For TRC20 Blockchain STMC COIN Coin ICO Coin

COMMUNITY

“The STMC COIN team is committed to develop a platform with the potential to become the standard for assets and payments in cryptocurrencies and fiat assets. Where people can easily invest and grow their assets gradually with trust & peace of mind.”

INTRODUCTION

Name : STMC COIN

Ticker : STMC

Type : Trc20

Platform : Tron

VISION

STMC COIN is an ambitious project dedicated to the establishment of a truly decentralized Internet and its infrastructure. STMC COIN built on Tron blockchain, The TRON Protocol, one of the largest blockchain-based operating systems in the world, offers public blockchain support of high throughput, high scalability, and high availability for all Decentralized Applications (DApps) in the TRON ecosystem.

MISSION

To grow as a benchmark in cryptocurrency industry by 2022. By gaining popularity throughout the world & will be stored in every wallet in the world by crypto community. Giving huge returns to our holders and growing their wallets to billions & trillions with our further future planning's and upcoming projects.

BACKGROUND

The introduction of Bitcoin in 2009 revolutionized society's perception of the traditional financial system in the wake of the Great Recession (2007-2008). As centralized hedge funds and banks collapsed from speculation in opaque financial derivatives, blockchain technology provided a transparent universal ledger from which anybody could glean transaction information. The transactions were cryptographically secured using a Proof of Work (PoW) consensus mechanism, thus preventing double spend issues.

In late 2013, the Ethereum white paper proposed a network in which smart contracts and a Turing-complete Ethereum Virtual Machine (EVM) would allow developers to interact with the network through DApps.

However, as transaction volumes in Bitcoin and Ethereum peaked in 2017, it was apparent from the low transaction throughput times and high transaction fees that cryptocurrencies like Bitcoin and Ethereum in their existing state were not scalable for widespread adoption.

Thus, **TRON** was founded and envisioned as an innovative solution to these pressing scalability challenges.

& same legacy will be carried out by **STMC COIN**.

COLD WALLET

Cold wallet, also known as offline wallet, keeps the private key completely disconnected from any network. Cold wallets are usually installed on "cold" devices (e.g. computers or mobile phones staying offline) to ensure the security of TRX private key.

DApp

Decentralized Application is an App that operates without a centrally trusted party. An application that enables direct interaction/agreements/communication between end users and/or resources without a middleman.

NEED & USAGE

STMC COIN is worlds first accumulative asset backed up cryptocurrency. Which is backed up by real **TRON** & can be swapped easily with **TRON**. Need as a growing currency with stability for huge returns. Usage as a payment gateway and a real asset.

Soon it will be growing due to the backup accumulation of **TRON**, A real smart option for investors to grow their money more and more.

BACKED UP BY DUAL ACCUMULATION

1st backed up with real Tron (Tron accumulated regularly).

2nd Tron price itself increasing.(will grow more and more with time)

These key features will regularly give up a boost to this real crypto.

KEY FEATURES

1st Real backed up as gold.

2nd payment gateway.

Fastest payment mode all across the world with backed up key features. With fastest payment speed due to Tron blockchain.

ABSTRACT

Smart contract is one of the most important parts of modern blockchains. Smart contracts are deployed on blockchains, triggered automatically and cannot be modified after deployed. These features make smart contracts the best solution for traditional digital contracts. However, smart contracts cannot communicate with data outside the blockchains. **STMC COIN** is a decentralized network, which provides more secure services than the normal ones. Probable optimizations are also included in this paper, which illustrates the directions for **STMC COIN** in the future.

CONTRACT

Total Supply	-	2 Cr. 22 Lakh
Circulating Supply	-	10000
Contract	-	TAuV2tb1WAjhSPhcfPM2bqrMg5iqCjuPC5
Issuing Time	-	2022-06-16 07:05:15 (UTC)

DISTRIBUTION

- ❖ Server Maintenance – 3% -
- ❖ R&D – 3%
- ❖ ICO Airdrops – 5%
- ❖ Team – 10%
- ❖ Rewards – 10%
- ❖ Emergency Fund – 2%
- ❖ Bounty – 2%
- ❖ Mining Reward – 47%
